

Year 4 Home Learning Term 5

Here are some examples of home learning tasks you could complete across the next few weeks. There are a range of subject areas to choose from and a range of different learning styles. Please pick and choose depending on your interests and the things you have at home. Please do email me pictures to show me your creations!

World Earth Day

World Earth day is on 22nd April. Research this special day and then create a newspaper article or poster telling us all about it. This Pobble presentation might help you...

VE day research

Find out as much information as you can about VE day. What does it celebrate? When is it? How did it happen? Can you create an interesting way of showing what you have found out? It could be a fact file, a Powerpoint or something different!

VE day newspaper report or diary

Imagine you were there at the real VE day. Document what it would have been like in a newspaper report or diary.

Electricity safety

We should have been learning about electricity this term. Can you create a poster all about safety around electricity and electrical items? This BBC Bitesize clip might help you.

<https://www.bbc.co.uk/bitesize/topics/zg82n39/articles/zftv382>

VE day bunting

VE day celebrations should be happening on Friday 8th May. Create some bunting to decorate your house and garden. Think about what colours might be good to choose for this.

Letter writing

Use your excellent letter writing skills to write a letter to someone in your family you are missing at the moment.

VE day stay at home party

We won't be able to have our class 'street' party but you could have one at home with your family. You could:

- Plan and make some food to have at your party
- Design some placemats
- Create a fun tablecloth out of paper or material you might have at home
- Create some entertainment for your party—1940s style!
- Dress up for the occasion— try to get your family to dress up too— can you do 1940s style?
- Write a newspaper report about your party.
- Send me lots of pictures of your party!

Electrical symbols

Research on the internet the different electrical symbols you might use to make an electrical circuit diagram. Can you find one for bulb, wire, battery and switch? Can you draw and label your own diagrams?

Author study

Choose your favourite author to write a fact file about. Use what you already know about their books and then research on the internet to write an informative fact file. Make sure you include some illustrations!

Junk modelling

Use your rubbish to make something amazing! How creative can you be? Once your creation is finished, write a description to go with it.
